Federico Interlandi Zoireff

Software Engineer | Back End Developer | Full Stack Developer
Argentina

Summary

Full Stack Developer and Specialist Electronic Engineer:

My initial path after graduating as an engineer was the field of industry, where I gained experience working in a team as the maintenance manager of an effluent treatment plant.

Then I decided to change my approach 180 degrees to be able to grow with knowledge that I am really passionate about, which is software, programming and the IT field.

That is why I decided to do a specialization in computer technology integration at the National University of Tucumán to start my path as a Full Stack Developer with a strong backend orientation.

I gained experience developing web applications with the following techs frameworks and languages:

Techs:

Node Js - Express Js

React

Redux

Material UI

Postgres

Mongo Db

Frameworks

Vite.js

Nest

Next

Languages:

TypeScript

Javascript

SQL

HTML - CSS

Cloud: IBM CCloud - Google Cloud - AWS

Management of gitFlow for production and development.
Proactive development with the ability to lead work teams.

You can see my repositories here:

Github: <https://github.com/FEDEIZ>

Personal brand:

Something that opened my mind and increased my passion for IT and technology was my trip to China through Huawei Seed For the Future Program. A student training scholarship in Shenzhen and Beijing with the IT company Huawei Technologies Co Ltd. The communication was permanently in English and I took courses on 5G technologies and the Internet of Things.

I am passionate about music. I have had musical band formations and presentations at public events.

I have also given private guitar classes and I had an initial musical training at the Provincial Conservatory of Music and with private classes. Accompany in events of various themes.

Experience

Coderhouse

Backend Teacher Support

December 2023 - Present (1 month)

Argentina

Fundacion Plan 21

1 year 1 month

Tech Lead Full Stack

July 2023 - Present (6 months)

Argentina

Development of modules for the YvY application. Coordination of a team of developers Testing in test and production environments Coordination with the auxiliary teams Scrum Open Source Community Management

Working with partners like IBM Call For Code Program Teams, Henry Bootcamp Volunteers and so

Back End Developer

December 2022 - July 2023 (8 months)

Argentina

Developing modules for the YvY API. Migration process from Python to Node JS. Team Work with another 3 volunteer Techs: Typescript - Clean architecture - IBM Cloud - Docker

TUCUMAN'S WATER SOCIETY

Chief Maintenance

January 2019 - Present (5 years)

Las Talitas, Tucuman, Argentina

Preventive, predictive and preventative maintenance of electromechanical equipment in Las Talitas Sewage Effluent Plant. Maintenance and updating of control and automation equipment, management of PLC and SCADA programming. Network infrastructure. Power electronics.

Among the achievements that I achieved, I can name having designed new support control circuits in critical situations to avoid flooding in storms.

Henry

Teaching Assistant

September 2022 - February 2023 (6 months)

Argentina
